Everton Otavio Afonso

Full Stack Developer | React | Node.js | TypeScript | VTEX IO | PostgreSQL

CONTATOS: evertonafonso0@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience in e-commerce development, specializing in React, Node.js, TypeScript, Next.js, GraphQL, REST APIs, and VTEX IO.

Currently working at Cadastra and dedicated to Samsung SDS, supporting an international e-commerce operation across the React and VTEX ecosystems. Experienced in building scalable applications and reusable components, developing services and middleware, integrating APIs, optimizing GraphQL queries, maintaining VTEX Master Data, and resolving production incidents.

Strong background in Headless Commerce, performance optimization, Clean Code, debugging, code reviews, and collaboration with multidisciplinary teams throughout the software development lifecycle.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS, SASS/SCSS, jQuery

Backend: Node.js, REST APIs, GraphQL, Services, Middleware

E-commerce: VTEX IO, VTEX Master Data, Headless Commerce

Databases: PostgreSQL, VTEX Master Data

Development: Clean Code, Performance Optimization, Debugging, Code Review, Reusable Components, Scalable Applications

Tools and Methodologies: Git, Figma, Agile Methodologies

Samsung SDS — International E-commerce Operation

Client Project | Cadastra

Currently dedicated to international projects for Samsung SDS, supporting an international e-commerce operation.

- Develop applications and reusable components using React, TypeScript, SCSS/SASS, and GraphQL.
- Develop and maintain services, middleware, and endpoints on the VTEX platform.
- Integrate internal and external APIs to enable communication between systems.
- Investigate and resolve production incidents and technical issues through debugging.
- Optimize GraphQL queries and continuously improve application performance.
- Model and maintain data using VTEX Master Data.
- Participate in technical refinement sessions, code reviews, and collaboration with Product, UX/UI, QA, and Backend teams.

Cadastra | Full Stack Developer *Remote | May 2024 – Present*

Cadastra is a company focused on digital channel growth and digital performance in Latin America, developing solutions for large e-commerce operations.

Main responsibilities:

- Develop Full Stack applications for e-commerce using React, Next.js, Node.js, and TypeScript, across Frontend and Backend.
- Develop and maintain services, REST APIs, and GraphQL APIs for integration between platforms and systems.
- Implement Headless Commerce solutions using VTEX IO, focusing on scalability, performance, and flexibility.
- Develop reusable components and scalable features following software architecture and Clean Code practices.
- Optimize application performance through refactoring, structural improvements, and continuous evolution.
- Participate in technical analysis, solution definition, code reviews, and collaboration with multidisciplinary teams using Agile.

Technologies: Node.js, React.js, Next.js, TypeScript, GraphQL, VTEX IO.

CoreBiz | Frontend Developer *Remote | October 2021 – May 2024*

CoreBiz is a company focused on e-commerce development using the VTEX platform in Latin America.

Main responsibilities:

- Develop solutions for large-scale e-commerce operations using VTEX IO.
- Develop reusable React components, focusing on scalability, reusability, and maintainability.
- Implement Landing Pages and responsive interfaces based on Figma designs.
- Integrate REST and GraphQL APIs using Ajax, Fetch, and Axios.
- Optimize application performance through refactoring and frontend best practices.
- Participate in code reviews and collaborate with Designers, Product Owners, QA professionals, and developers.

Technologies: React.js, JavaScript, TypeScript, GraphQL, HTML, CSS, SASS, jQuery, VTEX IO.

EDUCATION

Federal Institute of Education, Science and Technology of Southern Minas Gerais Campus Machado - Bachelor's Degree in Information Systems (2017 - 2021)

LANGUAGES

Portuguese: Native

English: Working proficiency in reading and writing; currently improving speaking skills.

AVAILABILITY

Work Model: Remote

Location: Brazil

International Experience: Currently dedicated to an international Samsung SDS e-commerce operation.

Availability: Full-time remote | Available for 4+ hours of overlap with U.S. time zones
